

Matthew Long

Sunnyvale, CA 94087 | 669-246-8579 | mlong2904@gmail.com | <https://www.linkedin.com/in/mjslong/> | <https://mlong2904.github.io/>

EDUCATION

Purdue University, Mitch Daniels School of Business

Bachelor of Science, Economics

Minor: Finance and Management

Concentration: Data Analytics

West Lafayette, IN

Dec 2026

PROFESSIONAL EXPERIENCE

Molex

Project Management Intern

Fremont, California

May 2025 – Present

- Coordinated with firmware, software, and hardware teams to define project goals and rollout timelines
- Built a retrieval-augmented AI agent with Claude Code to extract data from 200+ page technical specifications and generate requirements documentation
- Analyzed optical performance data in Python for lasers used in Erbium-Doped Fiber Amplifiers (EDFAs)

Turbo AI

Contracted Marketer

Remote

Sep 2025 – Feb 2026

- Produced high-performing short-form content driving visibility and engagement on TikTok, Instagram, and YouTube
- Delivered 750K+ views through targeted scripts aimed at college students
- Achieved 1M+ impressions through strategic content distribution

LEADERSHIP AND INVOLVEMENT

Purdue Judo Club

Treasurer

West Lafayette, IN

Jan 2026 – Present

- Manage over \$5,000 worth of equipment
- Generated over \$1,000 worth of fundraising through dues and fundraising with local restaurants

Purdue Momentum

Project Manager

West Lafayette, IN

Sep 2025 – Dec 2025

- Managed cross functional team building Python-based fixed income forecast and allocation model
- Structured simulation workflow and standardized modeling assumptions across analysts

Purdue Sports Analytics Club

Analyst

West Lafayette, IN

Aug 2023 - Present

- Created a Python script to scrape college basketball statistical sites and convert it into a readable csv file
- Worked with 4 other members using the coding language R to analyze college basketball data to predict which teams would make college basketball playoffs

PROJECTS

Quantifying NBA Player Value Using Machine Learning

- Developed a Ridge Regression model to quantify player value using advanced basketball statistics
- Designed a data pipeline to aggregate and analyze performance data, producing season-level rankings and custom metrics
- Created a proprietary WAR metric evaluating player impact relative to replacement level, adjusted for durability

AI Study Tool

- Built a full-stack AI study platform (React, Supabase, PostgreSQL) centralizing notes, flashcards, quizzes, and exam planning
- Integrated an LLM API to auto-generate cited flashcards and quizzes from course materials via prompt engineering
- Built an AI interview-prep feature generating mock questions from a user's resume, job description, and target company

Seasonal Demand Forecasting for Inventory Planning (Course Project)

- Generated a synthetic apparel sales dataset in Python using historical temperature trends across multiple countries
- Built a linear regression forecasting model in Excel to estimate demand and analyze weather-sales relationships
- Conducted exploratory data analysis to identify seasonal demand patterns for inventory planning

RELEVANT SKILLS

- Python (pandas, NumPy, scikit-learn), SQL, Microsoft Excel (PivotTables, XLOOKUP/VLOOKUP, Linear Regression)
- React, Supabase, PostgreSQL
- Prompt Engineering, LLM APIs, Claude Code
